

Label scale SM-120BLL

SM-120BLL is a price-calculating scale with built-in Linerless printer. It has DIGI's unique auto cutter that gives you variable labels depending on how much text an article needs.

The Linerless printer's label roller is easy to change and since there is no support film needed, just put the roll in place and close the cover so the scale is ready to use. The 32 hotkeys enable the most frequent items to be easily accessible.

The compact design of the scale makes it easy to place. A clear LCD display makes it easy to handle and program. The origin tag is handled smoothly and easily via a quick selection.

- ✓ Compact and lightweight
- ✓ Clear LCD-display
- ✓ 32 Hotkeys enable the most frequent items
- ✓ Linerless printer with DIGI's unique auto cutter
- ✓ The origin tag is handled smoothly and easily via a quick selection
